

I am an avid user of satellite radio. I have a choice whether to listen to FM, AM or Satellite radio, and I have chosen satellite. I don't think it would be fair to limit the scope of what I can listen to on my radio just so the FM & AM broadcasters can have a monopoly on local content.

This is a FREE country where we can freely choose what we want to listen to. If FM & AM broadcasters want me to listen to them instead, they should win me over with better content, not by bullying around the new guy who does things better than they do.

If XM is forced to stop the local content, then what's next? Will we only be able to listen to songs that FM & AM decide we can? Stop the bullying and compete.
